

Envision Your Dream Stream

Answer these questions to create your dream income stream.

What idea do I have for a possible income stream?

How much money does this income stream require to get up and going?

When will this income stream start generating money?

How confident am I that the timing will work out the way I expect?

What is the expected timeline for getting a return on my investment (as in, making my money back)?

If that time line were doubled, would I still be able to make this investment?

If I did not make any money on this income stream or if I lost money on it, would I be putting my family's livelihood at a huge risk?
